

RECYFIX HICAP F **NEW**

High capacity drainage system for the highest load category.

**Yas Marina Circuit,
Abu Dhabi, U.A.E.**

RECYFIX HICAP F

High capacity drainage system for the highest load category.

1 Requirements

Drainage system for extreme conditions with

- high hydraulic requirements
- high loads
- large areas
- ailing sewer systems

2 Application areas

- parking areas
- supermarkets/shopping centres
- pedestrian areas
- airports
- industrial estates
- container terminals
- ports
- circuits and test tracks

3 Solutions

Special features of RECYFIX HICAP:

- drainage and retention in one component
- large selection of nominal widths
- for all loading classes and all common road surface finishes
- variety of variants:
 - stainless steel slot & design grating WAVE
 - ductile iron slots
- less manholes and outlets
- provides an uniform visual appearance also in lage projects
- no separate gratings
- no expensive pipe installations required
- high hydraulic capacity
- easy to maintain

SERVICE CHANNEL

RECYFIX HICAP F

Water drainage and retention.

Retention

The design of RECYFIX HICAP, channels is unique due to its high hydraulic efficiency which ensures additional retention capacity. The system simultaneously performs three tasks:

- drains water, even from large areas
- stores excessive amounts of water
- channels water to the discharge point

RECYFIX HICAP, eliminates the need for additional storage reservoirs.

Modular design - low number of connections

RECYFIX HICAP, is so effective because large areas can be implemented with one single channel run. Starting with a nominal width of 100 mm it offers the option to expand up to 680 mm.

Drainage wells can be installed in any chosen location used for connecting channels to sewage systems or for connecting other drainage channels - it can also be used as a pumping well/chamber.

Comparison of flow capacity l/s

Range of RECYFIX HICAP

A practical example:

The following practical example demonstrates the large drainage- and retention capacity of RECYFIX HICAP channels:

Logistics Centre Plovdiv, Bulgaria

Channel length: 356 m, divided:

- 66 m RECYFIX HICAP F 200 Type 5300, slot 28 mm
- 136 m RECYFIX HICAP F 300 Type 8300, slot 28 mm
- 154 m RECYFIX HICAP F 680 Type 10300, slot 28 mm

Total drainage area: 10,730 m²

Runoff coefficient (specified by the planner): 0.85

Rain yield factor (specified by the planner): 300 l/s ha

→ **Discharge capacity at end of channel run: 252 l/s**

One single channel run drains a surface of more than 10,000 m², directs the entire water amount over more than 356 m and at the end releases it into the public sewer at one single point at a rate of 252 l/s.

Water drainage and retention.

Sample calculation

RECYFIX HICAP F, ductile iron mesh 13/28

The hydraulic advantages of RECYFIX HICAP channels can be demonstrated by the following calculation:

Inlet capacity of a ductile iron mesh 13/28 mm grating, determined at Prague Technical University:

4.0 l/s per metre

Frequently occurring yield from rain events:

150 l/s per hectare

$$150 \text{ l/s ha} = 0.015 \text{ l/s m}^2$$

$$\frac{4.0 \text{ l/s m}}{0.015 \text{ l/s m}^2} = 266.67 \text{ m}^2$$

Result of this example:

1 m RECYFIX HICAP channel with ductile iron mesh 13/28 mm grating can discharge the rainwater from 266.67 m² when the yield is 150 litres per second and hectare.

Rain event
150 l/s per hectare

Area to be drained
133 m²

Inlet capacity of RECYFIX HICAP F

(applies to all nominal widths)

stainless steel slot 24 mm		5.8 l/s per metre
stainless steel design grating WAVE 6 mm		2.3 l/s per metre
ductile iron slot 6 mm		3.1 l/s per metre
ductile iron mesh 13/28 mm		5.8 l/s per metre
ductile iron slot 28 mm		6.8 l/s per metre
ductile iron slot 14 mm		4.6 l/s per metre

measured during excess backwater testing at 10 mm

**Flow capacity

YOUR BENEFITS WITH **RECYFIX HICAP F**

FAST AND EASY INSTALLATION

- easy to handle and install without heavy lifting equipment
- innovative Link&Lock grating connection for easy and quick straight channel alignment
- integrated tongue and groove joint
- PP channel body can be cut, drilled and worked easily on site
- reduced pipe-work installations

= TIME- & COST SAVINGS

INDIVIDUAL SOLUTIONS

- accommodates radius installation
- wide range of uniform design gratings in KTL ('cathodic dip' coated) and stainless steel
- configurable as 'constant-depth' or 'stepped-fall'
- cable and pipe installations can be laid through throat voids between funnels
- ductile iron top on the surface can be interrupted while channels continue underground

= DESIGN FLEXIBILITY

HIGH RESISTANCE

- high-level resistance to fuels/oils, frost, salt and UV-rays
- withstands high temperature differences
- fit-for-purpose in climate temperatures ranging from minus - 50 °C to + 80 °C and more
- gratings in spheroidal ductile iron (KTL 'cathodic dip' coated); for high impact/corrosion resistance

= QUALITY ASSURED & LONGEVITY

HIGH-GRADE MATERIAL

- top inlet made of high-quality ductile iron → much higher tensile and compressive strength than channels made of polymer/resin concrete
- high-grade **RECYFIX** channel components from very light and almost unbreakable material
- 100 % recycled PP composite body (and 100 % recyclable) for full environmental standards compliance
- smooth inner surface for superior flow characteristics
- 0 % water absorption

= QUALITY- & PERFORMANCE ASSURED

VARIOUS CONNECTION POSSIBILITIES

- end cap with channel connection option
- simple possibility for preparation of corner and T-connections in connection with the trash box
- step-fall connector for connecting the next nominal width
- various pre-formed pipe-connections for added flexibility

= DESIGN FLEXIBILITY / PERFORMANCE ASSURED

LARGE RETENTION VOLUME

- drainage and retention in one component
- high capacity and back-pressure capacity due to a variety of nominal widths
- fewer chamber and pipe connections required

= PERFORMANCE ASSURED / COST SAVINGS

HIGH STABILITY

- designed for superior resistance to dynamic forces and loads up to class F 900
- torsion-free ribs and throat voids for additional structural integrity and rigidity

= PERFORMANCE ASSURED

IDEAL FOR ...

drainage and retention for the highest load areas, such as airports, industrial estates and container terminals.

RECYFIX HICAP F

High capacity drainage system for the highest load category.

RECYFIX HICAP channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

**Category
A 15**

**Category
B 125**

**Category
C 250**

**Category
D 400**

**Category
E 600**

**Category
F 900**

Drainage and retention system for larger areas.**

Report from the field: RECYFIX HICAP F channels for Heathrow Airport, London

With 67 million travellers annually, Heathrow Airport in London is Europe's busiest airport. Worldwide it takes third place behind Atlanta and Chicago. This important hub in international air traffic is operated by BAA, British Airports Authority, the largest airport operator worldwide. 75 % of the British Airways fleet is based at Heathrow Airport.

At the southern section of the airport the British Airways service park was expanded. The construction site abutted right on the runway and taxiway. The demands on the new service site were immense: here airplanes of all types and sizes pass - including the Airbus A380, which was

also a main reason for the reconstruction. The aircraft tugs alone weigh 80 tons and, just as the airplanes, drive and turn on the traffic areas. The demands on the drainage systems are accordingly high.

Project progress

In 1999 BAA was supplied with FASERFIX SUPER channels for the Gatwick airport and installed in the British Airways hangars and Concorde maintenance hangars. One year later, FASERFIX SUPER KS 100 channels were delivered to London City Airport. The assigned engineering office was very satisfied with the quality and service. In 2003 BAA broached the topic of installation and handling of drainage systems. The main topic of the discussions was the extreme weight of the products and the associated high employment of machines during installation.

On multiple occasions, HAURATON contacted various departments of BAA and presented the advantages of RECYFIX products (lightweight, easy handling, meets British "Health and Safety Regulations" = One-man-lift = max. 25 kg). Drainage channels from this line were presented in various meetings and BAA decided across the board to work with HAURATON in the area of RECYFIX.

RECYFIX HICAP F - eco-friendly and 'easy to handle'

Another key criterion for BAA was recycling. Airport planning and operation are subject to stringent environmental requirements. Products made of recycled plastic are therefore especially suited.

Suppliers routinely need to present BAA with product innovations which offer cost savings in installation and maintenance. In 2006 the time came for HAURATON to present the new line RECYFIX HICAP. The feedback was very positive, with BAA immediately recognising the resulting advantage in installation and maintenance, and the installation at Heathrow was decided.

Installed items

- 380 m RECYFIX HICAP F 8000
- 100 m RECYFIX HICAP F 5000
- 100 m RECYFIX HICAP F 3000

Lightweight elements, installed by one single worker.

Inlet slots of RECYFIX HICAP F system

System RECYFIX HICAP F offers a wide selection of inlet slots.

- slots are joined in an innovative way to ensure stability and facilitate the installation process
- wide range of design solutions provides designers with many customization options for planned investments.
- all standard inlet slots are protected by KTL coating which prevents oxidation of iron and ensures long term preservation of their black colour.
- galvanized iron grating is also available in silver colour.
- top-class aesthetics when using stainless steel gratings.

Ductile iron gratings

Slot 13/28 mm

- KTL coating
- slot size 13 x 28 mm
- intake cross-sect 172 cm²/m
- application: road surfaces

Slot 6 mm

- KTL coating
- slot size 5 x 51 mm
- intake cross-sect 154 cm²/m
- application: pedestrian traffic

Slot 14 mm

- KTL coating
- slot size 14 x 221 mm
- intake cross-sect 124 cm²/m
- application: industrial areas

Slot 28 mm

- KTL coating
- slot size 28 x 221 mm
- intake cross-sect. 248 cm²/m
- application: industrial areas

Stainless steel gratings

Slot 24 mm

- slot size 24 x 221 mm
- intake cross-sect 211 cm²/m
- application: industrial areas

Design grating WAVE 6 mm

- maximum slot width 6,5 mm
- intake cross-sect 78 cm²/m
- application: prestigious areas/pedestrian areas

Discontinuous design

Inlet elements don't have to be installed on every channel's body. The draining line is continuous under the surface, but its top part may be covered.

Customized solutions

All elements of the system can be adapted to the individual requirements and building conditions of a given project. Both the height of the channels and the preparation of special solutions can be adjusted:

- gratings design (individual pattern of stainless steel inlet slot),
- covers for trash boxes,
- or angular connections of channels.

Special solution for Bałtyk Tower in Poznań.
